Marcus Webb

Senior DevOps / Site Reliability Engineer

marcus.webb@example.com | +66 80 000 0004 | Bangkok, Thailand | github.com/marcus-webb-example

Summary

Site reliability engineer with 10+ years of experience running production systems on AWS and Kubernetes. Focused on automation, observability and cost control. Led platform teams of up to 6 engineers.

Experience

Lead SRE - Meridian Payments, Bangkok, Jan 2022 - Present

- Run a multi-account AWS platform (EKS, RDS, S3, CloudFront) serving 3M monthly users
- Cut cloud costs by 32% with rightsizing, Savings Plans and autoscaling
- Introduced SLOs and error budgets; reduced incident minutes by 45% year over year
- Built the CI/CD standard with GitHub Actions and ArgoCD used by 25 services
- Managed a team of 6 engineers; hired 4 and mentored 2 into senior roles

Senior DevOps Engineer - Coral Logistics, Bangkok, Mar 2018 - Dec 2021

- Migrated 40 services from on-premise VMs to Docker and Kubernetes
- Wrote Terraform modules for networking, databases and IAM
- Set up Prometheus, Grafana and Loki for monitoring and logging
- Automated database backups and disaster recovery drills

DevOps Engineer - Nimbus Software, Singapore, Jun 2015 - Feb 2018

- Maintained Jenkins pipelines and Ansible playbooks for 15 microservices
- Reduced deployment time from 2 hours to 12 minutes
- Was on the on-call rotation and led post-incident reviews

System Administrator - Sunrise Hosting, Bangkok, Jul 2012 - May 2015

- Administered 200+ Linux servers (CentOS, Ubuntu) and managed web hosting customers
- Scripted routine tasks in Bash and Python

Education

B.Eng. in Computer Engineering, Chulalongkorn University, 2008 - 2012

Technical Skills

Cloud: AWS (EKS, EC2, RDS, S3, Lambda, CloudFront), some GCP

Containers and orchestration: Docker, Kubernetes, Helm, ArgoCD

Infrastructure as code: Terraform, Ansible, CloudFormation

CI/CD: GitHub Actions, Jenkins, GitLab CI

Observability: Prometheus, Grafana, Loki, Datadog, PagerDuty

Languages: Python, Bash, Go (basic), SQL

Databases: PostgreSQL, MySQL, Redis

Certifications

AWS Certified Solutions Architect - Professional, 2023

AWS Certified DevOps Engineer - Professional, 2022

Certified Kubernetes Administrator (CKA), 2021

HashiCorp Certified: Terraform Associate, 2020

Selected Achievements

- Designed a zero-downtime database migration for the payments ledger (4 TB) with no customer impact
- Reduced mean time to recovery from 58 to 14 minutes by adding runbooks and automated rollbacks
- Introduced game days (failure drills) each quarter; found and fixed 19 hidden single points of failure
- Passed SOC 2 and PCI DSS audits as the technical owner of infrastructure controls
- Created an internal developer portal so teams can create a new service with pipelines in under 10 minutes

Talks and Open Source

Speaker, DevOps Thailand Meetup 2023: Error budgets in practice

Maintainer of terraform-aws-tidy-vpc, an open-source Terraform module (500+ stars)

Languages

English (fluent), Thai (native)
